

## TNI Information Technology Committee Meeting Summary September 17, 2015

---

### 1. Roll Call

Participants	Present
Daystrom, William	X
Evans, Nick	X
Friedman, Maria	
Hickman, Dan	
Kuhn, John (Chair)	
Parr, Jerry	X
Pierrot, Rebecca	
Shepherd, Mei Beth	X
Starr, Rip	X
Varner, Pam	
Ward, Keith (Vice Chair)	
Wlodarski, Jan	X

**Approve August 2015 Minutes – No quorum – approve next month.**

### 2. LAMS/Method Compendium

**Method Compendium:** Added lots of new methods over the past few weeks, including old water methods.

**LAMS:** No updates from PA. Sent emails at end of July and August, but no response. KS is waiting for the gen app. IL is almost ready to put FOAs in.

**Technology Code Issue:** We've had a request for "membrane conductivity" – a technology we don't have. The concern in the past was that a new technology might require PTs. ABs have never said no to a new technology and we have informed them on the new technology and when we haven't heard back, we've just added them. Does the PT Committee need to be informed about these new technologies too and do we need approval from them before we add them in? Or do we just include them in the email like we do with the ABs so they are aware?

**Gen App:** William has done a lot of work on the Gen App. It is almost ready for KS to use and get their labs to use it to upload their FOAs. Most of what he worked on was security and user accounts. Among other things, William has added login and email functionalities, taken care of bug fixes and minor tweaks, and spent a lot of time making sure the program is ready for the common user and ready to test.

### 3. Website Update

Need to change the NEMC website to open up the Call for Abstracts for 2016.

### 4. Next Meeting: October 15, 2015; 3:00pm EST.
