

TNI Information Technology Committee Meeting Summary January 24, 2017 (Houston Conference)

1. Roll Call

Participants	Present
Daystrom, William	X
Evans, Nick	X
Friedman, Maria	
Hickman, Dan	X
Kuhn, John (Chair)	
Parr, Jerry	
Shepherd, Mei Beth	
Starr, Rip	
Varner, Pam	
Ward, Keith (Vice Chair)	
Wlodarski, Jan	
Howland, Ed	

Dan Hickman chaired the meeting.

2. LAMS, Gen App

LAMS currently has 1,421 active labs with 209,454 Primary FOAs and 348,294 Secondary FOAs. There are 4,152 active methods and 3,230 active analytes. The method compendium now contains 3,068 PDF files.

PA has completed their upload of FOAs to LAMS leaving only KS, NY, and FL. IL has all drinking water labs FOAs and Dan is working on a solution to get the rest in soon. FL is reworking their database and will be getting in touch when they are ready to move forward. There were issues with LADEQ FOA data so it was scrubbed from the database and they are working on all their FOAs once again.

The LAMS User manual (what you can do without logging in) and the complete AB User manual have been finished, reviewed, and posted on the LAMS homepage.

Gen App 3.0 was discussed. The draft user manual is complete and under review. Testing of the Gen App is being done by TX, KS, and a large lab. We have already received feedback that we need to capture data for mobile labs and provide a document describing the required additional information each AB expects with an application. Dan will ask the LASEC to gather this info from the ABs.

William announced the completion of LAMS 2.0 and the committee was given a short presentation of the new app.

3. Next Meeting: February 16, 2017 at 3pm EST.
