

Bio created for TNI Committee Nomination

Kirstin Daigle, Stone Environmental, Inc.

Assistant Quality Assurance Manager

Kirstin Daigle holds a B.A. with Honors in geography from the University of Iowa. She began her career in environmental testing in 1995 with Savannah Laboratories, where she performed organic sample extraction for soil, water and biota. Savannah Laboratories became Severn Trent Laboratories then TestAmerica during her tenure. Today Ms. Daigle has over 22 years of experience in all phases of laboratory operations and quality control and quality assurance procedures including QA management, operations management and project management in an environmental analytical laboratory. She served as the Quality Assurance Manager of the analytical laboratory for 17 years and as Laboratory Director for 4 years where she managed compliance to the National Environmental Laboratory Accreditation Program (NELAP), Department of Defense (DoD ELAP), ISO 17025 Standards, EPA Contract Laboratory Program (CLP) and to Corporate Quality Assurance (QA) programs.

As a long standing member of the NELAC Institute (TNI) Ms. Daigle has served as active member, associate member or Chair of the following committees: Laboratory Accreditation Systems Executive Committee (LASEC), Proficiency Testing Committee, and Proficiency Testing Board, Nominating Committee, and Advocacy committee.

At Stone Environmental Ms. Daigle is responsible for ensuring that overall corporate quality assurance / quality control goals are met in coordination with the Quality Assurance Manager. In this capacity, she assists with the development of both project-related and non-project related quality systems for company processes and corporate services to maintain compliance with 40 CFR Part 160, Good Laboratory Practices (GLPs) and the NELAP Standards. She helps to support quality assurance (QAU) services on Agchem FIFRA projects and provides technical and project management support for geoscience projects with responsibilities that include research, field work, report preparation and review.
