Field Activities Committee (FAC)
Meeting Summary

May 22, 2012

1. Roll call:

Chair Justin Brown called the FAC meeting to order on May 22, 2012 at 11am EST. Attendance is recorded in Attachment A – there were 9 members present. There were no associate members on the call.

Minutes are distributed by e-mail and if no comments are received within the week, they are considered approved and posted to the TNI website.

2. Standards Update

Volume 1

This volume is almost complete. There is still some work to do with Proficiency Testing and there are still a handful of suggestions that relate to ISO language. The committee needs to decide whether a note regarding the ISO language is needed or if it should be left as is.

Justin asked for any additional comments:

- Mike noted that in definitions there is still a problem with the definitions of “measurement” and “analysis”. He feels that “measurement” should be defined in a manner that applies to the field. He can accept deleting a definition for “analysis”, but wants to see a definition for “measurement”. It is a term used throughout the document. “Measurement” is a production of a number. “Analysis” can be both quantitative and qualitative. Justin will look into why they were both removed and will get back to the committee. Mike read through the definitions that were previously used. Justin will look at the March minutes.

- Mike commented on Section 4.13.2.1.1. Technical records. If the person taking the sample is not doing the analysis, it must be properly transferred to the laboratory or person doing the analysis using a chain of custody. It should be relevant if transferred to any lab – whether an internal lab or not. Remove: “not affiliated with FSMO …”. The committee agreed with this change and Justin will take care of it.

- Mike also commented on 5.6. Testing Laboratories. 5.6.2.1 – There is a clause on testing and he does not think this ISO language is applicable. JoAnn noted that it applies to any type of lab that is testing samples. It could apply to a mobile lab. Mike
thinks a note is needed. He would want the note to emphasize the need for calibration. Maggie noted that the calibration language is already included in 5.6.2.1.4. This language further clarifies what Mike’s issue is. He had no further comment.

- There were no other comments.

Volume 2

A subcommittee was formed to look at defining the scope of accreditation. This subcommittee provided recommendations that Justin has incorporated into the last version of the standard he sent out. It was included in Section 7.1.3.2. A number of committee members did not think they had received a version with the change. The title of the section was changed to “Scope of Accreditation”. Mike thinks you have to refer back to the note in 7.1.3.1. This lists the programs. Maggie looked for some alternate language, but use of the term “regulatory program” does not work for everyone. The committee was in agreement that the note in 7.1.3.1 should be referred to – “… programs listed in the note in Section 7.1.3.1”.

There are plans for this subcommittee to prepare a guidance document for Scope of Accreditation after the standard is out for review. The other topics they want to address are matrix verses media and clarifying how NEFAP addresses mobile labs verses NELAP.

Interim accreditation (7.9.2.1.2) is another controversial issue. There have been some e-mail exchanges to remove bullet “a”. This removes the provision for interim accreditation. The ABs have had some issues with this section – specifically the term “interim”. Justin spoke with Marlene and she suggested removing “a”, but adding a section with language to help new ABs proceed forward to establish an FSMO program. There are issues in needing to wait for an FSMO to apply in order to do the technical evaluation. Mike discussed how this was handled within NELAP during start-up. Ilona noted that one AB has now had an FSMO apply and go through a technical evaluation.

The PT subcommittee is still working through their section. Justin hopes to get language changes from John within the week and Justin will incorporate them into the standard and get it out to everyone.

The deadline to get the standards completed is fast approaching. Much of the finish work will be done by e-mail. Justin asked that everyone watch their e-mails and get comments back as quickly as possible as documents are sent out for review.

Justin asked people to continue to review the standard and get comments to him.

3. New Business

- DC Meeting: There will be a number of committee members going. Marlene and Justin are looking at a possible committee dinner on Sunday with the NEFAP EC.
4. Next Meeting

The next meeting of the FAC will be determined by e-mail.

Action Items are included in Attachment B and Attachment C includes a listing of reminders.

The meeting was adjourned at noon EST when the call was interrupted by FreeConference.
