NEFAP Board Meeting Summary November 2, 2009

1. Roll call and approval of minutes:

Chair Marlene Moore called the first NEFAP Board meeting to order on November 2, 2009 at 3pm EST. Attendance is recorded in Attachment A.

2. Overview of Expectations

There will be a NEFAP Board Meeting in Chicago. There will be a ½ day session for FAC and NEFAP. We will need to be ready to present at this meeting.

Need to have something up and running by April to accommodate the tentative lead program start-up. This will be our first pilot. An FAC subcommittee has been working on the requirements for this program. A copy of their proposal has been forwarded to the NEFAP Board.

There is also a STAC testing program for Acid Rain that has an early 2010 deadline.

Update from Scott Evans (11/18/09):

The monitoring regulations for the Acid Rain program under 40 CFR 75 Appendix A Section 6.1 contain a requirement that ...

"On and after January 1, 2009, any Air Emission Testing Body (AETB) conducting relative accuracy test audits of CEMS and sorbant trap monitoring systems under this part must conform to the requirements of ASTM D7036-04 (incorporated by reference under § 75.6 of this part)."

This provision was challenged by the Utility Air Regulatory Group (UARG) and was stayed (see 73 FR 65554, November 4, 2008) until negotiations with UARG are complete. The Stack Testing Accreditation Council (STAC) has been in frequent contact with EPA during this period to monitor the progress of these negotiations. Although EPA cannot release the details of the negotiations, STAC has been informed that negotiations are almost complete and that this requirement will be re-instated in the near future with additional provisions to define when an AETB is not in conformance with the standard.

As currently written, it is possible that someone can self certify that they are in compliance with the rule. It does not require third party recognition. This is something STAC would like to see changed. The agency will have to ask for copies of procedures, etc., to confirm self certification. This is why many are pushing for a third party accreditation requirement.

This is an area that TNI-NEFAP should provide information about what they are doing. Scott will forward contact information to Marlene and she will make contact.

3. Formation of Subcomittees

Marlene reviewed the Project Summary chart (Attachment B) she sent to the Board members this week. The group was asked to sign-up for the various NEFAP Board categories to begin work on developing the Program. A listing of the subcommittee members and lead can be found in Attachment B.

Each of the new subcommittees will need to get together and get something fleshed out by the next teleconference (11/24/09). Review of progress and next steps will be discussed at the next teleconference. Ilona will send out an updated Project Summary so that the subcommittee leads can contact members to set a meeting date and begin emailing information. She will also resend any background information that may be useful to the subcommittees. The FAC standard can be found on the TNI website.

4. Newsletter

TNI will be publishing its newsletter and announcing the new NEFAP Board. We have a NEFAP seal/logo that will also be published in the newsletter.

5. Open Action Items

See chart.

6. New Items

None

7. Next Meeting

The next meeting of the NEFAP Board will be November 24, 2009 at 10:30am EST.

Action Items are included in Attachment C and Attachment D includes a listing of reminders.

The meeting was adjourned at 4:07pmEST.
