

## Summary of SIR Subcommittee Meeting

March 25, 2019

Present: Judy Morgan, Bill Hall, Carl Kircher, Lynn Bradley

Participants discussed the fourth revision of the draft Implementation Guidance (IG) document for SIR 290, as provided by Judy (thermometer with different correction factors at the ends of the temperature range), which is reduced to a single paragraph – use at a verified single point temperature or discard as defective.

Revisions of the first eight IGs from the NOLA Mentor Session were presented, with shortened references and the revised text provided by Bill. Because so many subcommittee members were absent, Judy asked that everyone review the revisions and provide any comments within one week. No comments were received, and these documents are considered ready for posting.

**The next SIR Subcommittee meeting will be Tuesday, April 23, 2019, at 12:30 pm Eastern.**
