| ,  |                             |                  |                |  |            |
|  |                             |                  |                |  |            |
| Justification or need for the star   | ndard or the change in t    | he standard:     |                |  |            |
| The current standard was finalized in 2009 and is in need of review and updating. Requests for standards   |                             |                  |                |  |            |
| interpretation have been received, indicating the need for improved clarity.                               |                             |                  |                |  |            |
|  |                             | .,               |                |  |            |
|  |                             |                  |                |  |            |
|  |                             |                  |                |  |            |
|  |                             |                  |                |  |            |
|  |                             |                  |                |  |            |
|  |                             |                  |                |  |            |
| How is the proposal an improve   | ment over the existing:     | standard:        |                |  |            |
| The current standard is method based, and the proposed modification will be technology based               |                             |                  |                |  |            |
| for clarity and greater ease of use.   |                             |                  |                |  |            |
